ABOUT MYSELF

I am Syed Muhammad Yahya, a motivated and detail-oriented Software Engineer with a strong academic background in Computer Science and Statistics. I achieved exceptional results in Matriculation (1070/1100) and Intermediate (836/1100), and have continued to build on this foundation through certifications in Freelancing, Digital Literacy, and C Programming.
Currently, I am gaining hands-on experience through an internship at Vision Academy and working as a Software Developer at PROGROX ERP, UAE. My responsibilities include developing and maintaining ERP systems using technologies such as C#, .NET, Blazor, and SQL Server. I actively participate in software testing, code reviews, and project management, while also ensuring a smooth user experience through technical support and documentation.
I am proficient in both desktop and web application development using the Microsoft technology stack (.NET, MAUI, API, Blazor), and comfortable with tools such as Microsoft Office, MySQL, and JavaScript. My goal is to contribute to innovative software solutions and secure a professional opportunity, preferably with a scholarship, in a forward-looking country where I can further grow my skills and make a meaningful impact on the global tech community.

WORK EXPERIENCE

🏢 **PROGROX ERP** – EMIRATE, UNITED ARAB EMIRATES

SOFTWARE DEVELOPER – 15/04/2024 – CURRENT

Software Development: Worked alongside a set of developers to conceptualize, write code for, and bring about new functionalities and improvements for the enterprise's ERP systems.
Software Management: Played a role in overseeing projects involving software, making sure that the development goals and timelines were adhered to and within the defined scope.
Software Testing: Thorough testing of software applications was conducted to identify and resolve bugs, ensuring that releases were both high-quality and reliable.
SQL Management: Created and improved SQL queries for getting, changing, and reporting data, while keeping the database accurate and fast.
Code Review: Participated in peer code reviews to maintain coding standards and improve code quality.
User Support: Offered technical assistance to end-users, resolving issues and providing solutions to improve the user experience.
Documentation: Established and preserved comprehensive documentation encompassing the functionalities of the software, user manuals, and technical specifications.
